SUMMARY

First-year Computer Science & Engineering student at MIT-ADT University with 1+ year of AI engineering experience in a production environment. Skilled in LLM integration, FastAPI backend development, retrieval-augmented generation (RAG), and multi-agent AI orchestration. Shipped three independent AI products; coordinated events for 300+ attendees; founded a student brand with 500+ units sold. Actively seeking internships in AI engineering, backend development, content strategy, or startup operations.

EXPERIENCE

Applied AI Engineer — Internship

Jan 2026 – Present

SYNK • Remote

- Designed and deployed AI-powered backend systems using Python, FastAPI, and WebSockets for real-time LLM interaction and production workflow automation
- Built retrieval-augmented generation (RAG) pipelines using ChromaDB and nomic-embed-text; implemented multi-model LLM orchestration via Ollama across local and remote AI frameworks
- Developed prompt engineering systems and agentic AI workflows; contributed to end-to-end testing and deployment of generative AI features
- Integrated local LLM inference, APScheduler-based automation, and AI-assisted content pipelines into scalable backend infrastructure

Content Writer & Backend Engineer — Internship

Apr 2026 – Present

UdaanScholars • Remote

- Build and maintain backend features including API integrations, data pipelines, and CMS systems for an ed-tech platform serving thousands of daily active users
- Write SEO-optimised long-form content on higher education and career pathways; apply on-page SEO best practices including keyword research, meta structuring, and content architecture

Management Team Member & Social Media Coordinator

Aug 2025 – Present

ACES MITSOE • Pune, India

- Coordinated 5+ technical and cultural college-level events with 100–500 participants, managing end-to-end logistics, vendor coordination, and on-ground operations
- Grew club social media reach by approximately 40% through a structured Reels content strategy and consistent publishing cadence

Founder & Operations Lead

Feb 2022 – Dec 2024

Luné Aesthetics • Delhi / Pune

- Founded and operated a student accessories brand from scratch; sold 500+ units within a school environment through direct sales, local sourcing, and self-managed inventory
- Handled end-to-end brand operations: product curation, pricing strategy, vendor negotiation, and customer relationship management

Independent Author — Psychological Fiction

May 2026 – Present

Self-Employed • Pune, India

- Writing a full-length psychological novel exploring identity, belief systems, and group dynamics; independently managing narrative structure, character development, and thematic consistency

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering

MIT-ADT University, Pune • Aug 2025 – May 2029 (Expected)

- Core Committee Member — ACES (Association of Computer Engineering Students)
- Relevant coursework: Mathematics Foundation for Computer Science, Digital Electronics, Engineering Physics

CERTIFICATIONS

Foundations in Generative AI

IBM
Apr 2026

Intro to Prompt Engineering

Simplilearn (ID: 10119751)
Apr 2026

Linguaskill CEFR B2

Cambridge University Press & Assessment (ID: L0000024134)
Mar 2026

Python & C Programming

IIT Bombay — Spoken Tutorial
Nov 2025 / Apr 2026

KEY ACHIEVEMENTS

3 Independent AI Products Shipped

Reel Craft AI (live), E.D.I.T.H. V8 (offline AI assistant), StartupOS AI (SaaS dashboard) — all built and deployed without a team

1+ Year Production AI Engineering

Delivered real-world AI backend work at SYNK as a first-year student, including RAG systems, multi-model LLM routing, and agentic workflows

286+ Launch Impressions — Reel Craft AI

Generated 286+ LinkedIn impressions on debut post for a live AI product within 24 hours of launch

SKILLS

AI & Generative AI: LLMs, Generative AI, RAG (Retrieval-Augmented Generation), Prompt Engineering, Multi-Agent Orchestration, Ollama, ChromaDB, Claude API, ChatGPT, Midjourney, Runway Gen-3, Kling, Google Veo

Backend: Python, FastAPI, WebSocket, REST APIs, SQLite, PostgreSQL, API Integration, Server-Side Development, WSL2

Frontend & Web: React, HTML, CSS, JavaScript, Vercel, Git, GitHub

Content & SEO: SEO Writing, Search Engine Optimisation, Long-Form Content, Content Strategy, Digital Marketing, Social Media Management, Instagram Reels

Operations: Event Management, Team Coordination, Sales, Negotiation, Vendor Management, Design Thinking, UX Research

Tools: Microsoft Office, Google Workspace, Canva, Figma, Telegram Bot API, ADB

Languages: English (CEFR B2 — Cambridge Certified), Hindi (Native)

PROJECTS

E.D.I.T.H. V8 — Offline Personal AI Assistant | *Python, FastAPI, WebSocket, Ollama, ChromaDB, Whisper, Piper TTS*

- Built a fully offline AI assistant with multi-model LLM routing across Llama 3.2, Qwen 2.5, CodeLlama, and LLaVA, running on WSL2 with a FastAPI + WebSocket backend
- Implemented local RAG pipeline using ChromaDB and nomic-embed-text embeddings for persistent, context-aware memory across sessions
- Integrated Whisper STT, Piper/Kokoro neural TTS, Telegram bot remote control, ADB-based Android automation, and APScheduler for daily briefings and task nudges
- Designed a real-time Stark-tech HUD frontend with animated system telemetry, voice waveform, and WebSocket-driven live interaction

GitHub: github.com/Aayushashsahu/EDITH-

Reel Craft AI — Live AI Caption Generator | *React, Vercel, Anthropic Claude API, Prompt Engineering*

- Designed and deployed an AI web app that generates Instagram Reel captions from user-supplied idea, platform, and tone inputs
- Built on viral content pattern analysis; launched independently and achieved 286+ LinkedIn impressions within 24 hours of going live

Live: lnkd.in/gRPNy2Dd

GitHub: github.com/Aayushashsahu/ai-caption-generator

Voice Assistant Maneuver — Real-Time Voice AI | *LiveKit, Groq Llama 3.3, Whisper STT, React*

- Built a real-time voice AI assistant using LiveKit for low-latency audio streaming, Groq-hosted Llama 3.3 for conversational AI inference, and Whisper for speech-to-text transcription
- Developed a React frontend with live transcription display and synchronized UI interactions, enabling seamless voice-driven conversations with sub-second response latency

GitHub: github.com/Aayushashsahu/Voice-Assistant-Maneuver-

StartupOS AI — AI Founder Operating System (In Progress) | *Python, FastAPI, React, WebSocket, SQLite, PostgreSQL, LLM APIs*

- Building a SaaS productivity dashboard for startup founders that unifies AI chat, meeting summarisation, CRM, task planning, content generation, and idea management
- Architected modular FastAPI backend with WebSocket support and SQLite/PostgreSQL-ready data layer; designed for multi-model LLM and local/remote inference support
- Developing React frontend with glassmorphism UI and AI-first interaction patterns; planning RAG-based memory and intelligent workflow automation

GitHub: github.com/Aayushashsahu/StartupOS-AI

Portfolio Website | *React, Vercel*

- Designed and deployed a personal portfolio showcasing projects, technical skills, and work experience

Live: potfolio-orpin-pi.vercel.app/

AI-Generated Short Film | *Runway Gen-3, Kling, Midjourney, Google Veo, Prompt Engineering*

- Produced an end-to-end AI-generated short film independently — handled storyboarding, text-to-image generation, text-to-video synthesis, and final editing
- Submitted as part of a Storyvord Generative AI Film Tech internship portfolio application

Industry Pulse — Mentorship Platform Concept | *Design Thinking, UX Research, Product Strategy*

- Led primary and secondary research identifying the education-to-industry skill gap; proposed a platform connecting students with verified industry mentors for real-time guidance
- Designed curriculum-gap mapping, mentor booking system, feedback loops, and mentor dashboards; applied HMW (How Might We) and SCAMPER frameworks throughout

@betheaayush — Instagram Content Strategy | *Reels SEO, Content Strategy, Personal Branding*

- Runs a fashion and lifestyle creator account applying structured caption templates, hashtag research, and Reels SEO to grow organic reach and engagement
